

Little Einsteins Class

For the 2024-25 School year the curriculum that will be used in our Little Einsteins class is part of the Texas School Ready program Toy Town participates in. The curriculum is online at <https://circleactivitycollection.org/pre-k-curriculum/#main>

Please understand there is no way we can put everything they are doing on one sheet of paper. However, they have a lesson / activity in each of the following area each day and you will be able to see the weekly lesson planes in brightwheel.

Reading – children being read to is majorly important and makes massive difference in how they do in school.

Writing– these activities will be things to help promote hand development. The best thing to do to help children develop the motor skills need for good handwriting later is playing with playdoh and using safety scissors. Scary for some but definitely important. Each friend will have a writing journal / page they will be working in daily. You will not always see this work due to these journals staying here.

Math – at this age we are counting items one on one. Recognizing numbers 1-20 but counting to 100. They work on counting by counting the days of school each day. They will start with one and count from 1 until ____ the last day of the 2024-25 school year. We will have a 100th day of school celebration as well.

Science & Health – during this time they will talk / learn about many things. Such as how plants grow or how bugs grow, or what is living and what is manmade, discover how things go from liquids to solids, and so much more. This also can include cook activities.

Social Studies – this time is a wide verity of talking & learning as well. They may learn about different jobs. The environment such as what some homes look like in other countries or even states.

Social & emotional development – this is when they will learn about sharing, using words to tell others what they want / need, interacting with other, and so much more.

Oral Language – This is done all day. One example is after reading a story talking about the story, who did what and what happened first, in the middle, or at the end of the story. Even talking about what they did on vacation or about their pets or siblings at home. Just giving them all chances to talk and tell stories.

Physical Development – This is why playing outside and running, jumping, hopping, and so on come into play. As well as dancing in the classroom to some great children's music.

Art – there favorite time and they love showing you what they create. When they show you their art it is a great time to work on oral language. Ask them to tell you about what they created you might be shocked at what they tell you.

This class is busy and each day is so very different from the day before. Here at Toy Town, we do our absolute best to start the steps towards a successful formal education. As always you will get pictures, videos, and notes showing and telling you what they have done in class each day via brightwheel.
